

Harmonic Drive Systems Inc.

Rotary Actuator – Hollow Shaft

Servo Motor – Hollow Shaft

SHA-M series

MMA series

Under Development

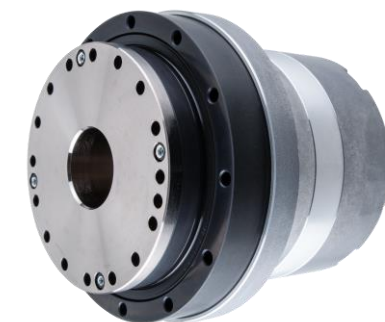

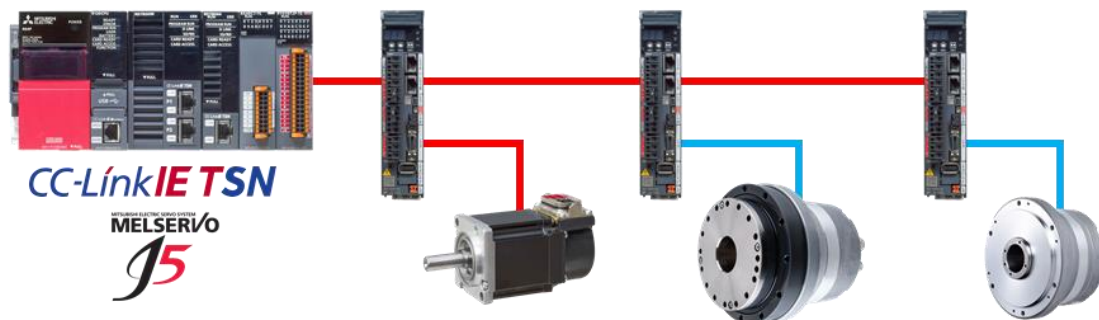

HarmonicDrive® Servo Actuator and Servo Motor are able to work with **MR-J5-G (CC-Link IE TSN)** network.

SHA-M series

The SHA-M series incorporates the speed reducer HarmonicDrive®, for precise control, to the flat hollow shaft servo motor. Positioning accuracy and resolution are equivalent to DDMs, but smaller in size and lighter in weight.

MMA series

The MMA series is flat servo motors with hollow shaft. The hollow shaft design provides the piping/wiring being layout on center of rotation without offsetting the motor, and cuts down the total size and cost.
