

CKD NIKKI DENSO CO., LTD.

Motor

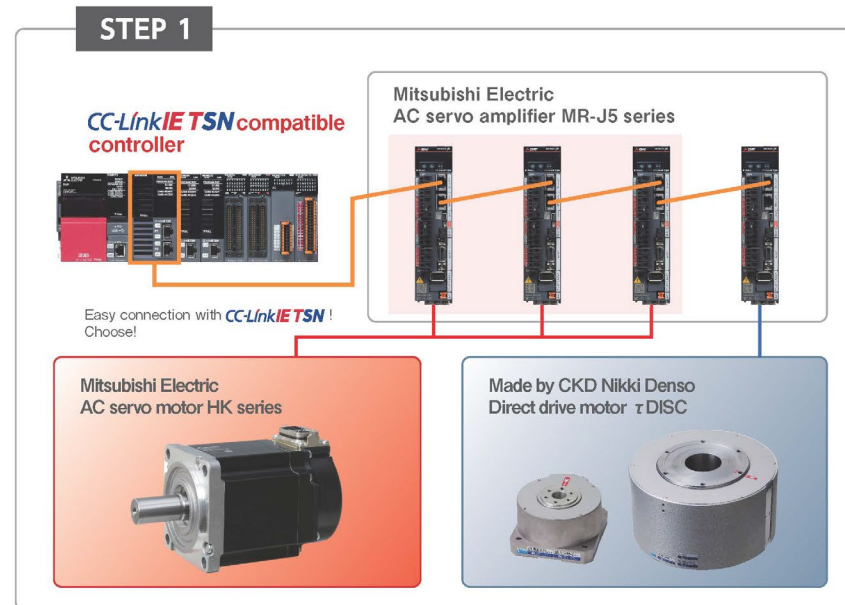

CC-Link I^ETSN compatible Direct Drive Motor 「τDISC」

Under development

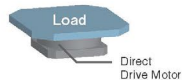

High-performance direct drive motor that achieves high tact operation, stable operation, and high-precision positioning

[STEP1] is decided to be commercialized by connecting Mitsubishi Electric AC servo amplifier "MELSERVO-J5"

Advantages of direct drive motors

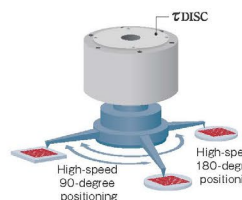

Machine performance can be upgraded without an intermediate mechanism

- High-rigidity, high-precision
- High efficiency
- Quietness
- Space saving
- maintenance-free

Application examples

Die bonders, Sorters etc.

- High-speed 90-degree positioning
- High-speed 180-degree positioning
