CC-Link IE TSN distributed remote module

XB6-CT-(N)

CC-Link IE TSN distributed remote module supports CC-Link IE TSN protocol. After a CC-Link IE TSN protocol adapter, it can be flexibly connected to digital input and output modules, analog input and output modules, temperature control modules, stepper drive modules, valve terminal, etc. Distributed remote module is a major upgrade on the basis of traditional distributed remote IO, which perfectly integrates logic control, motion control, temperature control, pneumatic control and industrial fieldbus, which greatly simplifies the design difficulty for customers And application costs.
